

MULTIPOINT LOCKING SYSTEM

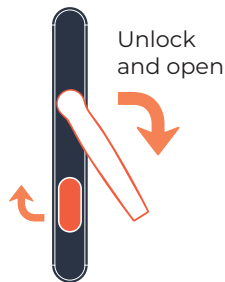

“Handle” with care

The multipoint lock has four locking points along the edge of the door. Lifting the handle draws them into the frame.

To lock the door so that it needs a key from the outside, turn the thumbturn on the inside, with the handle raised.

To unlock and open the door, (turn the thumbturn and) press the inside handle down by 90°.

**MAKE SURE THE DOOR IS COMPLETELY CLOSED
BEFORE ENGAGING THE MULTIPOINT LOCK**
